

LIONEL SERVICE STATIONS

Factory

Approved

Lionel Trains and Accessories are so well made that they require very little care. Cleaning and lubrication, which takes a few moments, is generally all that is necessary. However, there comes a time after long usage when you may desire to have your equipment tuned up—or rebuilt. For this work, The Lionel Corporation maintains two large Service Stations of its own: In New York City and Irvington, New Jersey. These departments, directly affiliated with Lionel, are prepared not only to give prompt and careful attention to service work, but also to furnish you with all information regarding our product, and aid you in planning a bigger and better railroad.

For the further convenience of the public, The Lionel Corporation has Approved Service Stations in more than 100 principal cities and communities throughout the United States and Canada.

Although these Approved Service Stations are independently operated, each has been carefully investigated from the standpoint of reliability and qualifications. The majority have been servicing and repairing Lionel Trains and equipment for many years. Visit the Lionel Service Station nearest you. Attendants will gladly help you solve any problems you may have and make any adjustments in your equipment to give it more efficient operation. They use genuine Lionel replacement parts and we believe their personnel and facilities adequately qualify them for prompt and efficient work at fair prices. We recommend their service in preference to others. On the following pages is a complete list of all Approved Service Stations.

The Lionel Corporation assumes no responsibility, financial or otherwise, that refers to material left or work done by Lionel Approved Service Stations which are privately owned and maintained. Any complaints or discourtesies brought to our attention will receive a prompt and thorough investigation.
